

UBKM

Bitumen glue

Bitumen adhesive for bonding underfloor trunking and floor boxes to bitumen membranes without undercoating. Cartridge 310 ml, black. The bitumen adhesive is characterised by good adhesion to bitumen sheets, metal sheets and damp substrates. It is suitable for outdoor use, weather-resistant and plastically deformable.

The substrate must be free of grease. For special applications or on damp substrates, we recommend checking adhesion in advance. Clean tools mechanically after use in combination with thinner.
